FORTRESS®
OSHA Stair System

OSHA Stairs Designed for Commercial Access

The **FORTRESS® OSHA Stair System** is designed to deliver safe, strong, and OSHA-compliant temporary or permanent access to mobile buildings, HVAC equipment, generators, and other elevated surfaces. Built from **aircraft-grade, all-aluminum components**, this modular stair and platform solution installs quickly, adjusts easily, and performs reliably in demanding environments.

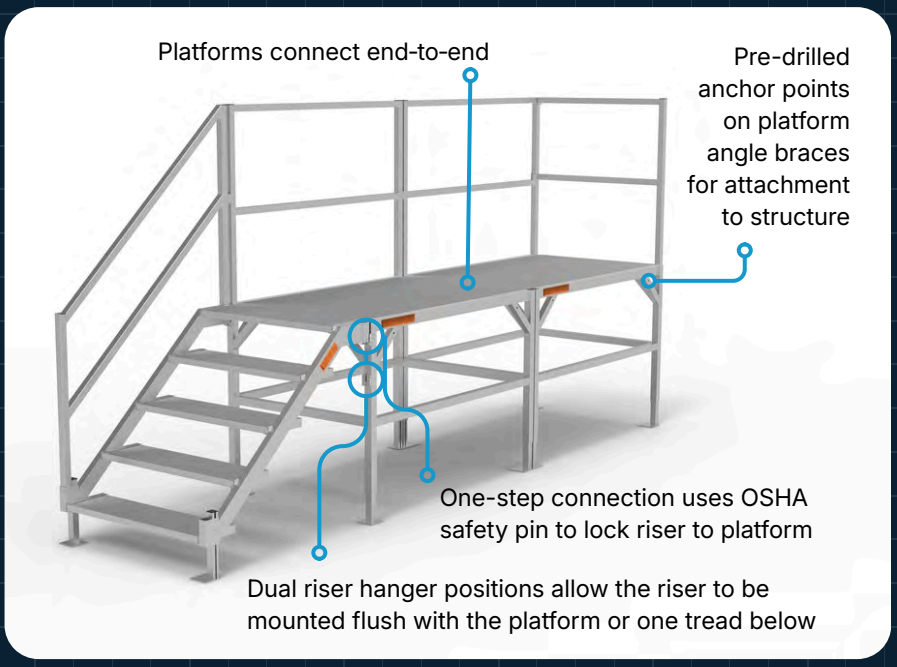

Key System Features

- **All-Aluminum, Non-Combustible Build** – Lightweight, corrosion-resistant aluminum won't rust, rot, or corrode—ideal for long-term indoor or outdoor use.
- **Slip-Resistant Tread** – All walking surfaces feature Gecko Grip®, our patented, raised-rib tread with a 2-tier, 3-point gripping surface. The innovative design also utilizes deep knurling for enhanced traction and secure footing.
- **Heavy-Duty Strength** – Pre-engineered, load-bearing aluminum components deliver exceptional rigidity and stability.
- **Adjustable Height Design** – Multiple riser sizes and field-adjustable legs provide the height adjustability to meet your exact specifications, while also allowing for uniform riser heights for code-compliant installation.
- **Independently Adjustable Legs** – Platform and riser legs adjust independently to allow for simple, precise on-site leveling on uneven ground.
- **Open-Riser Construction** – Meets OSHA standards, reduces debris buildup, and supports high-traffic use.
- **Fast Assembly & Modular Flexibility** – Prefabricated modular components enable rapid one-person installation using minimal tools and eliminate on-site fabrication costs and delays.
- **Handrails** – Hardware-free handrails are universal for left- or right-side installation, fold flat for easy transport and storage, and are available in multiple configurations to meet site layout requirements.
- **Low-Maintenance & Long-Life** – Engineered for long-term durability, the system provides virtually maintenance-free performance and adapts easily through transport, expansion, or reconfiguration to continually support evolving needs.
- **3-Year Warranty**

Designed to Fit Your Application

Unlike fabricated steel stairs, which require time-consuming design, welding, and installation, the FORTRESS system offers a **faster, cost-effective alternative** with modular components that eliminate custom fabrication delays. A variety of **prefabricated, off-the-shelf riser and platform** sizes are available, along with custom options designed to meet your exact specifications

- **Pre-assembled, bolt-together system** enables fast installation and flexible layouts without custom fabrication
- **Stock products ship within 24-48** hours to keep projects on schedule
- **Site-optimized layouts available**, with stamped drawings upon request
- **Modular design fits complex sites** with tight footprints, lengthy foot paths, turns, and elevation changes
- **Easy to install, expand, reconfigure, or relocate**, minimizing downtime and long-term costs

Quick Specs

Stairs:

- **Heights:** 2-7 riser standard stair models available with heights ranging from 12-1/2" to 68-11/16" to accommodate a wide variety of elevation needs.
- **Widths:** 40", 48", 54" and 60"

Platforms:

- 40" x 60", 48" x 60", 54" x 60", and 60" x 60"

Rated Load:

- 1,000 lbs.

Utilize our FORTRESS Calculator on our website to help determine what model and riser position will work for your specific elevation.

OSHA-compliant at 17"

OSHA-compliant at 25-1/2" & 34"

OSHA-compliant at 34" & 42-1/2"

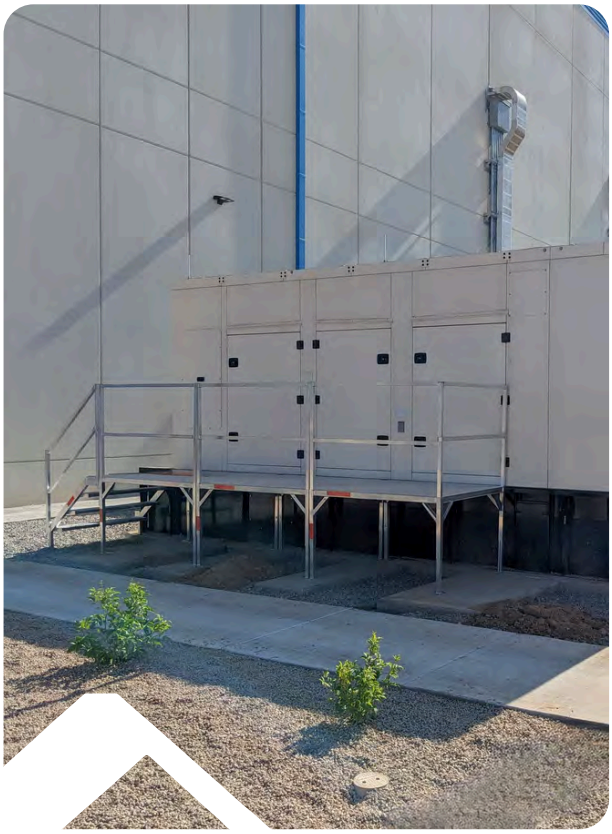

OSHA-compliant at 42-1/2" & 51"

OSHA-compliant at 51" & 59-1/2"

OSHA-compliant at 59-1/2" & 68"

Sustainability & Environmental Responsibility

Our all-aluminum, modular access systems are engineered not only for safety and performance, but also for long-term environmental responsibility. Aluminum is a highly sustainable material—**naturally corrosion resistant, infinitely recyclable, and lightweight for reduced transportation impact.** Its durability ensures decades of use with minimal maintenance, eliminating the need for replacement materials or coatings that contribute to waste.

The modularity of the FORTRESS OSHA Stair System further enhances sustainability. Components can be **reconfigured, reused, relocated, or expanded,** reducing the need for new materials and minimizing jobsite waste throughout the product's life cycle.

Due to their modularity and recycled content, our products can help contribute to several LEED v4.1 credits and other green building rating systems.

Together, these benefits support greener projects, lower environmental impact, and long-term resource conservation.

Built to Perform. Designed to Adapt.

The FORTRESS OSHA Stair System offers the durability of a permanent installation with the flexibility of a modular solution—making it the ideal choice for both temporary and long-term access needs.

Ideal Applications

- Modular and temporary structures
- Industrial and manufacturing facilities
- Rooftop access
- Equipment and machinery platforms
- Jobsite and construction access points

Compliance You Can Trust

Designed with compliance in mind, this stair system:

- Meets **OSHA** standards
- Uses pre-engineered components and a modular design to support efficient, controlled installation

This ensures safe, consistent access performance across a wide range of industries and installation environments.

Optional Accessories

Enhance safety, functionality, and site-specific performance with a range of optional accessories designed to integrate seamlessly with the stair system.

KICK PLATE
Platform kick plates can be attached to help prevent unwanted materials from falling below the platform surface. Required for OSHA compliance at 48" and above.

OVERSIZED FEET
May eliminate the need for pavers in most soil conditions.

Custom Capabilities

Custom designs are available to meet your unique site demands. Contact our team to discuss tailored configurations, sizes, tread types, and accessories.

CANOPY
Provides year-round protection from sun, rain, and snow, featuring a rust-resistant aluminum frame with a 22-gauge galvanized steel roof that attaches directly to the stair system.

Backed by ***over 40 years of experience***, **The Fortress** delivers all-aluminum modular stair systems you can rely on—job after job, year after year.

Our family-owned and operated company has built its reputation on **durable engineering, practical innovation, and products designed to perform** in demanding environments.

With lightweight, corrosion-resistant aluminum construction and a modular design **built for flexibility and growth**, The Fortress stairs and platforms provide safe, dependable access for today's sites and tomorrow's challenges.

When longevity, capability, and proven dependability matter, The Fortress is the name you can trust.
