TRANZVOLT LADDERVATOR PRO KIT
Roofing Platform

DeWalt Part ID: 40684
Milwaukee Part ID: 40686

The updated TranzVolt G2 surpasses previous models. With an extended two-year warranty, the TranzVolt G2 system is designed to withstand demanding job site conditions. This eco-friendly, cost-efficient product no longer requires fuel or oil. Further, it now utilizes an AmSteel-Blue high-performance, 12-strand single braid of 100% Dyneema® fiber cable, which has extremely low stretch, superior flex fatigue, and wear resistance.

The TranzVolt G2 Roofing Kit is a great tool for lifting materials, such as shingles, rolled goods, tools, and bulk roofing materials, in tight spots or when low-noise ordinances are being enforced. It carries material 44 ft. high at a rate of 2 ft. per second, reaching the height of a two-story building in under 25 seconds. Using two standard DeWalt Brand 20V batteries or Milwaukee Brand 18V rechargeable batteries, the Roofing Kit lifts up to 250 lbs. for eight hours. The design also incorporates a pivot and tilt feature at the top of the track, making for safe and secure removal and transportation of materials.

*Batteries not included
