TRANZVOLT LADDERVATOR PRO KIT

Tilt Back Platform

Solar Tilt Platform
DeWalt Part ID: 40683
Milwaukee Part ID: 40685

Roofing Platform
DeWalt Part ID: 40684
Milwaukee Part ID: 40686

The TranzVolt G2 system ensures safe material hoisting in challenging job site conditions. Backed by an extended two-year warranty, this eco-friendly, cost-efficient solution operates without fuel or oil, featuring a high-performance cable for minimal stretch and superior durability.

The Tilt Back Platform is ideal for lifting materials like solar panels, plywood, windows, shingles, tools, and more materials in tight spaces or noise-sensitive areas. Capable of lifting materials 44 ft. high at 2 ft. per second, it accommodates up to 250 lbs. for eight hours using two standard DeWalt or Milwaukee rechargeable batteries.

The design includes a pivot and tilt feature for secure material removal and transport. This prevents the user from reaching over the roof edge, maintaining their safety.

Installation Video

*Batteries not included

TRANZVOLT G2 LADDERVATOR

Key Features

- Lifts 2 ft. per second
- Lifting capacity of 250 lbs.
- Power box weighs only 33 lbs.
